Introducing TeamPAR's Tips and Tricks!

Have you ever moved furniture in a carpeted room only to find those awful dents in your carpet? We know we have, and we have a solution to share with you!

Introducing our 1st TeamPAR Tips & Tricks! Each month, we will provide you with a new tip or trick from TeamPAR to fix common problems or properly clean within your home or office. Our solution for carpet dents: placing ice cubes in the dent to restore the carpet pile!

#1: How do you raise flattened pile carpet?

You get the itch for a change and decide to move your bed to the opposite wall or flip your couch in your family room. You are excited by the new layout, but notice the heavy couch or bed legs left unsightly crush rings in your carpet. What do you do? Here is a simple tip that is sure to do the trick!

- Take a large ice cube (or a few smaller ice cubes) and place them over the crushed carpet area.
- Allow the cubes to melt. This can take a few hours.
- Once melted, take a toothbrush and brush the crushed carpet pile until it is equal with its uncrushed neighbors.
- Blot any excess water with a towel, vacuum and ta-da --- it should be good as new!

Do you have anything you need assistance solving? Let your friends @ TeamPAR know what is ailing your space and we will try to help!

TEAMPAR'S CRUSH OF THE WEEK

It is that time of year already -- when TeamPAR openly gushes on those industry friends that we like, respect, want to emulate or just make blush! TeamPAR is grateful that we are surrounded by clients and industry partners that are crush-worthy. Without further ado, here are the last two crushes from the Class of 2018!

[Shayonne Jefferson](#) is TeamPAR's 9th out of 10 Business Crush of 2018! Shayonne is a General Manager for JLL. She is a consummate professional and a Building Manager veteran. TeamPAR services dozens of buildings yearly, but we especially enjoy working with Shayonne because of her constant smile and ability to make her tenants feel welcome.

[Fred Montferrat](#) is TeamPAR's final Business Crushes of 2018! Fred is a planner and estimator at The Lawrenceville School and is an expert within educational institutions. He handles his job with grace and a determination to keep the school moving in a forward motion through sustainability initiatives, facility operations and team building goals. Fred has utilized the services of both PARflooring & PARsolutions and TeamPAR is proud to be helping The Lawrenceville School renovate their facilities.
