Time is almost up!

Believe it or not, 2018 is poised to enter the fourth quarter and our annual goals, mission and objectives will soon be up for review. Will our bosses be happy? There is still time to shine!

What dollars remain in your budget that you must spend before the funds are lost? TeamPAR will:

- create a Mothers Room, ensuring compliance with updated NJ laws.
- incorporate wellness equipment into common areas.
- change the chairs in employee café and update countertops.
- add a freshness to any space by incorporating corporate branding and fun murals!
- create an innovation area for team collaboration.
- incorporate biophilic aspects into any space - a green wall or even a company potted herb garden!

Perhaps this coupon will provide further incentive to call @TeamPAR to help make all of this happen!

Biophilic Design: Naturally Reclaiming Our Environment!

@ The offices of TeamPAR, Photographed by Tina Kolodzieski & Madelyn Le Frois

Biophilic Design is an innovative way of designing the places where we live, work, and learn. Sounds so mysterious...what does it mean? Simply, Biophilic Design is the conduit for satisfying the need for contact with nature in the modern built environment. **Contact with nature has many benefits that have been studied and proven:**

- Manufacturing workers are more productive when they move to facilities with natural light and restored landscapes.
- People recover faster from surgery and major illness when they have contact with nature.
- Test scores are higher and fewer absences occur in schools where natural lighting and access to

the outdoors is present.

Biophilic Design is not one thing - it is a combination of things - both apparent and subtle. Biophilic Design can be accomplished by bringing the forms and patterns of nature into a building:

- **Environmental Features:** water, sunlight, fire, views of the outdoors, plants and use of natural materials (stone, a tree converted into timber).
- **Natural Shapes:** Botanical motifs, animal motifs, shells, organic shapes, arches, domes, and vaults.
- **Natural Patterns:** Use of patina, scale and ratio of patterns, transitional spaces with sensory variability, use of functional replicas of nests, vines, coral reefs, trees and eggs.
- **Light & Space:** Natural light, filtered and diffused light, light pools, spatial harmony, spaciousness, inside-outside spaces.

Our senses are overloaded and we need to find simple ways to reconnect with nature to quiet our minds and allow our best selves to emerge with creative and productive thoughts. We need to consciously design with nature in mind, to honor and respect the earth and our relationship to it, to make us whole. Check out the tech giant's incorporation of Biophilic Design. They have embraced this needed trend and we hope you will too.

In the News

What is going on in the commercial interior design world? These articles can give you more insight into industry highlights:

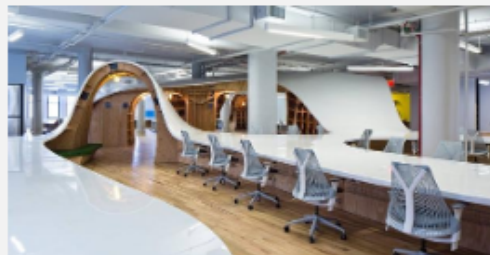

Standing Desks: Apple Makes A Statement

Apple CEO Tim Cook recently disclosed one new detail about the work environment: everyone gets a standing desk.

Killer Office Spaces

Here are 20 offices that make us happy just looking at them. Collectively, they are triumphs of design, tech, and sustainability.

Google's 4K Touchscreen Whiteboard

Google's Jamboard is not a kitchen app for curating PB&J recipes – it's a 55-inch digital whiteboard, with pen and touch input, companion iOS and Android apps, an Nvidia Jetson TX1 processor on board and 4K resolution.

The only thing we do better than installing floors is building relationships.
